THE NEW SAFE-T EXTINGUISHER IS JUST AS EFFICIENT AS A TRADITIONAL EXTINGUISHER, BUT WITH A TOUCH OF ADDED DESIGNER STYLE!

All too often relegated to some dark corner of your home or worse still, completely non-existent, the fire extinguisher has regained its credibility thanks to DNC TAG and its SAFE-T, an extinguisher that has been remodelled into a design object, 100% made in Belgium. DNC TAG has redesigned the great classic found in our cars and homes: the red extinguisher has been revamped in bright pink, gold, with checks, a cow motif or an American flag so that this traditional object, which often has a negative connotation, now adds a touch of colour and fun to our surroundings.

Besides being of a highly original design, SAFE-T will swiftly extinguish the initial stages of domestic fires and is technically manufactured in accordance with safety standard EN 3-8. With this new extinguisher, you have something that is both useful and a pleasure. It no longer belongs in the cupboard, in the cellar or under the car seat but in full view for you to enjoy. An ideal gift for others or for yourself.
